

HOW TO CLEAR HISTORY AND CACHE FILES IN GOOGLE CHROME

When you use a browser, like Chrome, it saves some information from websites in its cache and cookies. Clearing them fixes certain problems, like loading or formatting issues on sites.

Did you know: The more information that is saved in the cache, the slower your computer will be browsing the web.

Summary

1. Within your browser click on the Chrome menu Icon (three dots at the top right of the screen)
2. Select History, and History again
3. Click clear browsing data
4. Time Range: All Time
5. Make sure the following options are ticked:
 - a. Browsing History
 - b. Cookies & other site data
 - c. Cached images and files.
6. Click Clear data

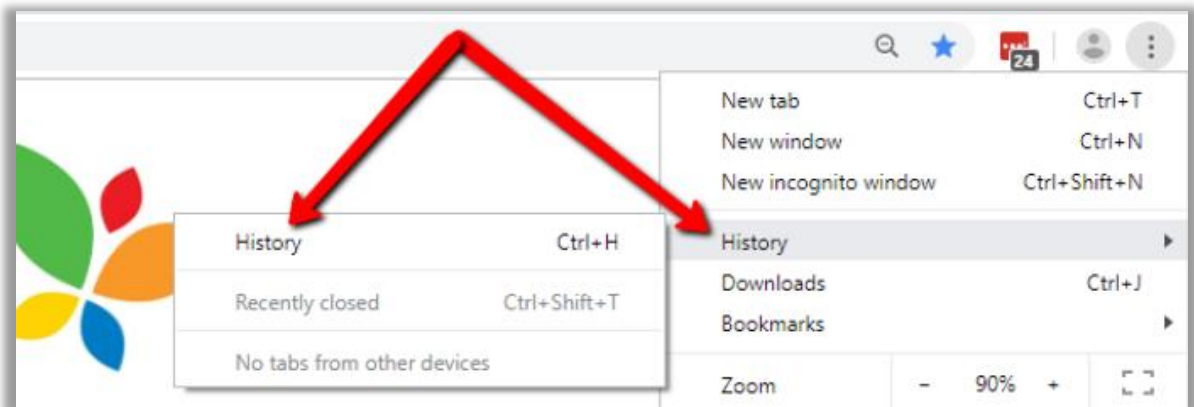

HOW TO CLEAR HISTORY AND CACHE FILES IN GOOGLE CHROME
